SKILLS

Programming: C++, Python

AI / Machine Learning: scikit-learn, Computer Vision, Reinforcement Learning, Supervised & Unsupervised Learning

LLM & Generative AI: Retrieval-Augmented Generation (RAG), LangChain, Vector Embeddings, FAISS

Backend Development: FastAPI, Django, REST APIs, Pydantic, SQLAlchemy

Data & Visualization: Pandas, NumPy, Matplotlib, Seaborn, Power BI, Streamlit

Databases & Tools: PostgreSQL, SQLite, Docker, Git, GitHub, Postman

PROJECTS

AthenaCode AI: AI Powered GitHub Repository Intelligence Assistant [Link](#) Mar'12

Python, FastAPI, Tree-sitter, Sentence Transformers, FAISS, RAG, React, Chrome Extension

- **Created** an AI-powered assistant that helps developers explore large GitHub repositories through natural-language queries grounded in source code context.
- **Constructed** a repository analysis workflow incorporating **Tree-sitter parsing, semantic chunking, embedding generation, and FAISS vector indexing** for efficient code retrieval.
- **Integrated** a **Retrieval-Augmented Generation architecture** combining Sentence Transformer embeddings with vector similarity search to improve answer relevance and reduce hallucinated responses.
- **Delivered** a developer-focused interface via **Chrome extension and React frontend**, connected to **FastAPI backend services** for interactive repository analysis.

AlphaMetrics : AI Powered Retail Intelligence Platform [Link](#) Feb' 20

Python, FastAPI, React, OpenCV, NumPy, PostgreSQL

- Architected an AI-enabled retail platform that digitizes shop inventory operations and automates purchase tracking, sales recording, and profit calculation.
- Implemented a **computer vision pipeline** utilizing image embeddings to recognize products and retrieve stored purchase prices during checkout.
- Established scalable **FastAPI REST** endpoints and relational database models to manage product records, transaction logs, and automated stock updates.
- Produced a business analytics module that aggregates transaction data to generate revenue insights and top-selling product identification.

CareerConnect AI : LLM-Powered Technical Interview Preparation Platform [Link](#) Jan' 26

Django, Python, JavaScript, LangChain, FAISS, LLM APIs

- Engineered an AI-driven platform that simulates technical interviews and automatically analyzes candidate responses.
- Implemented dynamic interview generation capable of producing mixed and subject-specific questions (Python, SQL, AI) using a **Retrieval-Augmented Generation pipeline**.
- Constructed a resume-aware interview engine that extracts resume content, **generates vector embeddings**, indexes them in FAISS, and retrieves contextual data to generate personalized interview questions.
- Established an automated evaluation mechanism leveraging **semantic similarity scoring** to produce subject-wise performance insights and analytics dashboards.

CERTIFICATES

Master Generative AI & Generative AI tools (ChatGPT & more) | Infosys Aug' 25

Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate | Oracle May' 25

Packet Switching Networks and Algorithms | Coursera Apr' 24

EDUCATION

Lovely Professional University

Bachelor of Technology

Computer Science and Engineering with Artificial Intelligence and Machine Learning: CGPA: 7.6

Phagwara, Punjab

Aug' 23-Present

Chate School

Intermediate

Percentage: 74

Auranagabad, Maharashtra

Mar' 21- May'22
